Interactive Apps

arcadm Testing

- Paraview-egl
- Spyder
- VS Code
- Jupyter for Python and Julia
- JupyterLab
- Large Language Model Chat
- MATLAB
- Owl Desktop
- RStudio

Legacy Apps

IDE

- Code Server
- Eclipse
- Nvidia-Nsight-Eclipse

Jupyter for Python and Julia

User can launch jupyter notebook or lab with python and julia enabled.

Cluster

owl

Account

arcadm

- The allocation you would like to use for SLURM.

Partition

dev_q

- Following are the GPU partitions in each cluster:
  - Tinkercliffs: dgx_normal_q, dgx_dev_q, a100_normal_q, a100_dev_q
  - Falcon: All partitions
  - Owl: No GPU nodes

Number of hours (min-1, max-48)

2

Number of cores per node (min-1, max-32)

4

☐ Show Advanced

- For conda environment, start directory and JupyterLab UI

☐ I would like to receive an email when the session starts
