

laptop

login node and storage

Task 1: configuration

/Users/me_user/.ssh
*Use ssh-keygen to generate
key pair = (public key, private key)
Manually copy public key to cluster*

/home/user_name/.ssh
Manually put public key in authorized_keys file

Task 2: Ssh agent

Use ssh-add to add/start
an ssh-agent

Task 3: Aliases

Use config file to
construct aliases to
cluster login nodes.
