OPEN OnDemand

OnDemand provides an integrated, single access point for all of your HPC resources.

Message of the Day

Welcome to Virginia Tech's instance of Open OnDemand!

Please refer to our documentation for usage instructions.

Change Log:

- January 31, 2025
  - Cluster Resource Availability Tool
    - Please visit the Help menu link "Cluster Resource Availability" for a new tool designed to help find a free queue to run your jobs based on your job requirements.
- January 8, 2025
  - New applications for JupyterLab/MATLAB, currently Owl only, other clusters will be added soon
  - New Desktop App
    - User home is now mounted under `/home/$USER/clusterhome`, projects is still at `/projects`
    - Firefox updated, homepage now set to the ARC docs site
    - SSH-less X forwarding, Just open the terminal under the "other" category in the xfce applications menu and run GUI apps from the node.
    - Image viewer (ristretto) and movie player (mpv) also installed
  - Previous "Interactive Apps" moved to "Legacy Apps" dropdown
  - Tinkercliffs disabled until maintenance is completed, use infer for Legacy Apps.
  - Pinned apps removed, same apps are available in the dropdowns.
  - Jobs Composer link removed from the UI, though it is still accessible
